"Condensed milkmaids, so to speak." -Louisville Courier-Journal. His Protection.

"So he was not affected by her flow of tears?"

"No; he has too much dry humor." Ain't None.

"I'm always getting into hot water a my house. 'You couldn't say that if you lived in ours."

Different Colors of Clouds. To answer to a subscriber's question concerning the color of clouds, the Nature and Science department of St. Micholas says:

White clouds are those which are so thin that sunlight comes through them, or else they are in such a position that the side seen by the observer is lighted by the sunlight. Black clouds are those that are so thick, or dense, that little sunlight passes through them, and at the same time are not illuminated by sunlight on the side seen by the observer. It is these heavy, large clouds that are most likely to produce rain.-St. Nich-

Rebutting a Libel. John D. Rockefeller, talking to a Cleveland clergyman, said one day with a whimsical but rather sad

"From the stories that are told about my love for money and my disregard for humanity, you'd think I was some such monster as the criminal of the anecdote. "A judge once said to a terrible

criminal:

" 'And you actually had the heart to murder this poor man for 50 cents!" "Well, your honor,' said the crimi nat, with an injured innocence air well, your honor, what do you expect? Fifty cents here-and 50 cents thereit soon mounts up!""-Washingtor

SCHOOL TEACHERS. Also Have Things to Learn.

"For many years I had used cofree and refused to be convinced of its bad effect upon the human system," writes a veteran school teacher.

"Ten years ago I was obliged to give up my much-loved work in the public schools after years of continuous labor. I had developed a well defined case of chronic coffee poisoning.

"The troubles were constipation, flutterings of the heart, a thumping in the top of my head, and various parts of my body, twitching of my Hmbs, shaking of my head and, at times after exertion, a general "gone" feeling, with a toper's desire for very atrong coffee. I was a nervous wreck for years.

"A short time ago friends came to visit us and they brought a package of Postum with them, and urged me th try it, I was prejudiced because some years back I had drunk a cup of weak, tasteless stuff called Postum which I did not like at all,

"This time, however, my friends made the Postum according to directions on the package, and it won me. Seen I found myself improving in a most decided fashion.

"The odor of boiling coffee no longer tempts me. I am so greatly benefited by Postum that if I continue to improve as I am now, I'll begin to think I have found the Fountain of Perpetual Youth. This is no fancy letter but stubborn facts which I am glad to make known."

Name given by Postum Co., Battle Breek, Mich. Write for a copy of "The Road to Wellville"

Postum now comes in two forms: Regular Postum-must be well boiled.

Instant Postum-is a soluble powder. A teaspoonful dissolves quickly in a cup of hot water and, with cream -and sugar, makes a delicious beverage instantly. Grocers sell both kinds. "There's a Reason" for Postum.

EDUCATION AND BUSINESS METHODS ARE NECESSARY TO SUCCESSFUL FARMING NOW

Farmers With High School Training Make Nearly Double Average Income of Those who Have Had Only Common Schooling, Declare Department of Agriculture Investigators -- They That Start Early Harvest Most Profits--Give Boys An Opportunity.

with merely a common school educa- through ignorance or indifference on tion, and those who start earliest the part of the operator. Under good make the most profits, according to management they can generally be the Department of Agriculture's in- made successful vestigator. The Department's Office of Farm Management has been con- Improper organization of a large ducting a series of investigations in the corn-belt, which have brought out area limits the small farm. Single many details that should be of prac- crops or single live-stock enterprises tical value to all agriculturalists. These results have just been published in a new bulletin.

Under average conditions the farm, according to this bulletin, is no place for the weak or for those unable to direct work. The man who intends to spend his working life in the country should start early, for success is not gained in a moment but by many years of persistent effort. It is true that some farmers have made small fortunes in a short time, but this is usually through a phenomenal rise in land values. Few men have become Those who have done so usually needed a lifetime in which to work. Through skill in management and by hard labor a comfortable living and moderate profits may be expected. Those persons who are turning to the farm with the idea of reaping large incomes are doomed to severe disappointment.

Those making the poorest incomes were 28 years of age when they started farming and were past 30 when they became owners. On the average the oldest men are making the least profits.

Many farmers with very little schooling succeed, but these same men would do better if they had the opportunity of further training. No one ever hears a farmer regret that he spent a part of his early life in school.

There were only eight men, four owners and four tenants, who never had a school training. Of the owners and tenants, 77 per cent attended a common or district school. About 18 per cent attended a high school. one out of every 35 went to college or to some institution of similar

grade. On the whole the tenants had re ceived more education than the owners, 23 per cent of them having more than a district-school education, while only 20 per cent of the owners had best training made the largest inmes, although they were materially helped in doing this by much larger farms and greater capital.

Farming is a business the same as any other industry, and until our schools teach some of the fundamental principles governing profitable farming, the farm boy is likely to seek work elsewhere. Considering that the farm boys of today will be the farmers tomorrow, too little at:ention is given to their training.

Many boys leave the farm because they see no future in it. Another important reason is the lack of profitable work at home. A moderatesized farm is necessary to give employment to the farmer and his sons. The small farm does not provide work; hence, the boys must find employment elsewhere. Let them fully understand how farm profits and losses are made and there will be an incentive to remain. First make our farms profitable, and the question of keeping the boys there will solve it-

Successful farming is an individual economic problem. The farm is a ana, Illinois and Iowa." combination of enterprise, and their individual organization will determine. in a large measure, its profitableness. Sufficient area and a proper E. J. ARMERS with a high-school acteristic of unsuccessful farming ateducation make nearly double tracts much public attention. Such the average income of those farms are unprofitable largely

Diversity of the farm business .farm limits its possibilities, just as seldom utilize farm labor to its maximum. By having several crops there is not only better distribution of labor, but the chances of total loss from crop failures are lessened. Fortunately, corn, oats and wheat utilize the farmer's time prettty thoroughly through the growing season. In some parts of this country certain crops that need labor only a part of the year may be so profitable that the farmer can afford to be idle the rest of the year. However, these are the exceptions. Most crops are not profitable enough to permit any such rich from the real profits of the land, practice. Idle horses and machinery are nearly as expensive as idle men. If the working equipment can all be kept busy on paying enterprises, suc-

cess is almost assured.

Equally important in the selection of enterprises to permit the maximum use of labor is the consideration of the profitableness of each. Dairy cows and cash crops may utilize all of the farmer's time, but in certain regions, possibly, dairy cattle under the best management could hardly be made to pay a profit. Markets and other conditions have to be carefully considered in choosing the enterprises which are to constitute the main sources of income. Fitting the right crop to the soil and selling it to the proper market or feeding it to the right kind of live stock are important factors. Following such types of farming as are unsuited to the region is often a cause of unprofitable agriculture in some of the older set-

The wide fluctuation in prices of certain crops makes it extremely difficult for a farmer to choose a definite rotation. One year they will be such as to give handsome profits on certain crops, and the next year may be insufficient to pay the cost of production. The question confronting the average farmer is not so much one of production as it is of market ing. Most farmers are able to grow such training. Those men having the a sufficient quantity of crops to give them a very comfortable living if they are assured of reasonable prices for their products. However, under present conditions the farmer has to take big chances with nearly all of his crops. If he is so unfortunate as to have a combination of crops every one of which is low in price in some particular year, severe losses will be the result. Potatoes, apples, peaches, onions, and cabbage are good illustrations of the crops that fluctuate widely in price from year to year.

The essential characteristics of the more successful farms are a sufficient area and a proper organization of well-selected farm enterprises to permit the maximum use of men, horses, and machinery.

The bulletin just issued gives in detail the results of the thorough study that the Department's specialists have made of farming as a business in the corn-belt, and can be had free upon application to the U. S. Department of Agriculture, Washington, D. C., for Bulletin 41, entitled. "A Farm-Management Survey of Three Representative Areas in Indi-

How to Place Your Rugs. To preserve harmony in a room, the rugs, whether one or more, must be laid on the floor with the edges parallel with the edges of the floor; not thrown on, creating all sorts of ugly spots by the rugs and by the floor spots left around them. If one rug is used it should conform as nearly as possible to the room proportions, particularly when the room is pleasing in its proportions. When the room is not so the rug may help to make it so. For example, if the room is too long for the width, select a rug which will nearly cover the room in width and will leave a considerable area of floor exposed at either end. This will tend to shorten the appearance of the room and to shorten it in length by opposition of direction. If a room is to be distinctly a period room, an | nentlycure Con-Oriental rug can seldom be used to advantage.

Quaintness in Black Satin. The picture illustrates a dancing or
